## Safe handling of lubricants for construction machinery

Belgian lubricant manufacturer Wolf Oil Corporation has developed a range specifically for the construction industry that optimizes operating times, improving the efficiency of the machinery fleet. The lubricants offer a very long service life, a high degree of wear protection and a wide range of applications. A well thought-out concept with colour-coded symbols ensures safe use and easy handling.

The use of specific symbols and colours helps users to select the right lubricants for the specific components and applications of their construction machinery. This not only ensures quick and easy handling, it also increases operational safety and reliability and makes stock control simpler.

As part of its Complete Off Road Solution Concept (CORS) for construction machines, Wolf Oil offers its customers a comprehensive fleet analysis and draws up a detailed lubrication plan for each machine based on this analysis. The concept is rounded off by Wolf Oil's warranty, which, in addition to the manufacturer's warranty, gives the customer additional security in the operation of the machinery.

The lubricants in the Wolf Off-Road range are distributed in Germany by EMKA-Schmiertechnik.

### **Wolf Corporation**

Wolf Oil Corporation is a leading, independent producer of performance lubricants with over 60 years of expertise. We pride ourselves on being a pure player in our industry. All Wolf products are on-site blended in Belgium, because we attach as much importance to the quality of our products as we do to the quality of our service. Moreover, thanks to our dedicated R&D team, our on-site laboratory and our ISO certification, we guarantee the highest quality in every step of our production process. This approach gives us a unique edge within our competitive industry. We welcome the many challenges of producing lubricants of the highest quality, because no one blends technology with service like we do.
