Press release

Ref: HK/388f

Date of issue: April 2020

ONLINE SUPPORT & CPD

Business couldn't be further from normal right now but HENKEL has a long-established online network for its customers to access support and instruction to ensure the wheels of industry keep turning. Take LOCTITE® threadlocking, for example, there are now multiple ways for customers to learn more about the technology.

The first port of call is HENKEL's new website on the subject - <http://henkel-adhesives.com/uk/threadlockers> - which is packed with application information including a downloadable user guide, videos on topics such as why assemblies fail and how to disassemble threadlocked assemblies. There are also videos of how various industrial sectors have benefited from the technology.

The HENKEL sales engineers continue to provide on-line consultations and demonstrations. To request this support go to <https://www.henkel-adhesives.com/uk/en/insights/loctite-services-signup.html>. This link will also give customers access to webinars on threadlocking and other engineering adhesive technologies.

Within the LinkedIn environment <https://www.linkedin.com/showcase/henkel-adhesives> the HENKEL team is offering free online consultations to help customers reinforce their maintenance and repair processes. Anyone interested in such support is invited to contact the team at adhesives-mysg@henkel.com and HENKEL will then connect them with an expert. #maintenance #threadlockers #adhesives #loctite
