

## **RENOVOTEC PRESS RELEASE**

### **RENOVOTEC EXPANDS TO MEET GROWING DEMAND FOR ITS MANAGED PRINT SERVICE**

**--Company opens new, 50% larger 'Renovotec Managed Print' service centre**

**--Renovotec's managed print service is unique in manufacturing and logistics according to the company**

**--*"The coronavirus is driving user demand for larger and more flexible printer fleets, at lower cost. Renovotec Managed Print meets that demand"* says Renovotec MD Richard Gilliard**

***For immediate release 20 August 2020***---Renovotec, the UK's fastest growing rugged hardware, software and services provider for supply chain companies is expanding to meet escalating demand for its 'Renovotec Managed Print' service by opening a 50% larger service centre in Wellingborough, Northants the company announced today. Renovotec Managed Print is the only service of its kind in the supply chain manufacturing and logistics industries says Renovotec.

Renovotec industry user feedback shows that trends in today's covid-19 marketplace are driving company demand for an increase in the size and flexibility of their printer fleets - including the need for social distancing, requiring more packing benches; the need for more frequent cleaning; and the rapid expansion of e-commerce. The same feedback reveals that there is strong company pressure to drive down the cost of printer ownership. Timely print head replacement, remote system management, fast-response engineering support and maintenance and other managed print services can optimise business continuity and performance, while also reducing costs by enabling a printer fleet to be right-sized say Renovotec.

"The coronavirus is driving user demand for larger and more flexible printer fleets, at lower cost" says Renovotec MD Richard Gilliard. "Renovotec Managed Print meets that demand."

**Company background ([www.renovotec.com](http://www.renovotec.com))**

Renovotec is the UK's fastest growing provider of rugged hardware software and services for supply chain users. The company's approach to rugged hardware purchase and rental is customer-driven and manufacturer-independent.

Renovotec's rugged-hardware-as-a-service (r-HaaS) combines ongoing user support with zero capital outlay, allowing companies to scale their hardware flexibly, and with confidence.

Renovotec is an expert in field mobility service technology running on rugged mobile devices, and is the UK's leading exponent of automatic data capture (AIDC) on rugged and mobile hardware using voice, scanning and RFID technology.
