
Empteezy and Dyce Carriers: A Partnership Worth Promoting

With a focus on quality customer experience from start to finish, [Empteezy Ltd](#) recognised the need for a delivery partner of esteemed reputation which they found in [Dyce Carriers](#).

Working together since 2017, the spill containment specialists approached the National Road Transport business that operates a fleet of 100 modern haulage trucks. With a variety of large steel units being manufactured at the Empteezy factory in Livingston, access to the Dyce Carrier range of HIAB vehicles and trailers ensures however big a unit may be, it is guaranteed the very best and safest of journeys.

This is particularly prevalent in the bespoke compounds and bunded storage units manufactured by Empteezy. The latest project saw a three-part compound being delivered to the North of England with the ability to hold 192 drums or 16 IBCs. With dimensions of around 11 x 8 x 5 metres, the teams worked together to create a successful logistical solution.

The magnitude of these products are handled by Dyce Carriers perfectly, who are more than equipped to deal with abnormal loads via their extended trailers and experienced drivers.

It is not simply the quality of the fleet on offer that cements the strong working relationship between the two companies however; for Empteezy, it is important to work with an organisation that has reflected values. Both hold ISO 9001 and 14001 accreditations, improving on air quality and work hard to maintain the highest of environmental standards.

Most importantly, the relationship fostered by both companies allows for a seamless and productive partnership, helping to achieve excellent customer service. From Depot Manager to Driver, Dyce Carriers provide a customer facing solution Empteezy can be proud of.

Commenting on the successful relationship with Dyce Carriers, MD of Empteezy Bruce Wishart said, *“It is important to us that not only do we work with a company we are proud to be represented by, but that the people behind the scenes, getting the job done, are reliable, hard-working and go above and beyond to strive for excellence. This is very much what we experience from Dyce Carriers and look forward to working together for a long time to come.”*

This was echoed by Dyce Carriers MD Jason Moir who reiterated, “Being a family run business, our values and principles are very important to us. We have such a fantastic working relationship with Empteezy because they have such a strong set of core values, that are very much in-line with our own. It is always a pleasure to work with a company with such a commendable approach to business.”.
