

PRESS RELEASE

Snickers Workwear ProtecWork – increasing protection through layers.

This fully accredited and independently tested Protective Wear for heat, flame, electrical arc and chemical risk environments delivers market-leading risk-protection in a wide range of hazardous working environments.

The key features and benefits of the clothing includes the hi-tech, advanced fabric technology integral to the Base-, Mid- and Top-Layer garments for both men *and* women that combine well with the Snickers

Workwear hallmarks of best-in-class durability, comfort, ergonomics and fit.

Wear layers to increase your protection.

Research carried out by Snickers Workwear in the toughest of working environments has concluded that the best ways to improve your level of protection is to wear layers. The main benefit of wearing layers is that the air gap formed between different garments provides increased protection.

ProtecWork clothing is fully accredited to a variety of risk and bad weather working environments and all the garments are manufactured from tailor-made fabrics designed to respond to the demands of the conditions in which they're worn.

So with over 60 different garments and accessories to choose from, you can make sure you get the right protection, visibility, flexibility, comfort and durability. Check out the new Snickers Workwear *ProtecWork* range to fit your workday and wellbeing on site.
