### **NEW DEALERS WILL BOOST TCM GROWTH IN SCOTLAND AND EAST MIDLANDS**

TCM the dealer-led forklift brand has announced two new dealerships to further strengthen its national sales, service and support network.

Ace Handling, a Midlands-based forklift supplier with a 16year back story in the industry has been awarded the Rugby, Northampton and Coventry sub-region as the official TCM outlet and Lothian Mechanical Handling based in Bathgate near Edinburgh will become the exclusive TCM dealer for the central Scotland industrial belt and will also serve much of the north of the M8 Scotland region.

Both businesses have the essential long pedigree in the industry together with a solid after-sales support network including field-based service engineers and personalised support systems which are locally based and dedicated to serving their local customer base.

They will offer the full range of TCM forklifts; reach trucks and order picking products which are backed by the technical, digital and product development resources of one of the world's largest engineering businesses.

TCM's Dealership Director had this to say, "Our brand is based on a strong locally based dealership core which provides local service and support on a unique basis which is tailored to suit our customers. It means that customers always have a local contact point for all their needs and avoids them getting tangled in national call-centres or remote support services".

TCM has national coverage across the UK for all its products operating as a global brand with local direct support and service.

Graham Jones  
– TCM's Dealer Director
