MAKITA INTRODUCE NEW OMNIBOHRER MULTI-PURPOSE DRILL BITS

- New range of multi-material, multi-purpose drill bits
- Tungsten carbide tips
- Time saving and convenient
- Fast, efficient and accurate drilling in any material

The new OmniBohrer range of drill bits joins the extensive range of high performance Makita accessories. Bits in this multi-purpose collection are suitable for use with a diverse range of materials including concrete, tile, brick, slate, limestone, wood, composite materials, aluminium and plastics, totally eliminating the need to switch between bit types. Ultimately, the new OmniBohrer range is time saving while improving operator efficiency and accuracy.

The collection of 25 drill bits, ranging from 3 – 14mm diameter and lengths of 60 – 400mm, feature a high quality tungsten carbide tip that can be used for different applications across various industries. Tungsten carbide is more durable than many other materials because of its exceptional levels of toughness and hardness. The wide flutes of the OmniBohrer bits deliver quick and efficient material extraction.

This multi-purpose collection will be welcomed by many manufacturing professionals using multi-layer, or composite materials such as that used in the manufacture of windows and doors, or for fixing wood or metal to brickwork without the need to switch bit types.

Choose OmniBohrer drill bits for improved quality, convenience and versatility.

About Makita

Makita is a leading world class brand of professional power tools, accessories and work wear known for quality, performance and durability in rigorous industrial use. Operating for 45 years in the UK, Makita's offices are located in Milton Keynes, Bucks with distribution centres located throughout the U.K. Makita is Britain's number one professional power tool manufacturer offering an extensive inventory of over 620 products and accessories which include cordless drill/drivers, cordless combination drills; percussion drills; angle grinders; jigsaws and sanders, as well as a substantial amount of outdoor power equipment.

Makita's Telford manufacturing facility produces a range of power tools from carefully selected raw materials and with the most advanced manufacturing equipment in the world. Makita's Telford facility is a net exporter of professional power tools with 78% of its production going to other Makita operations worldwide. To ensure that Makita maintains its high quality standards, every machine undergoes testing and inspections throughout the whole manufacturing and assembly processes, including a final run-test under power before leaving the factory, which ensures optimum performance.

Makita (UK) Ltd is a founding member of United Kingdom Power Tool Alliance against Counterfeiting (UKPTAAC), a power tool industry alliance set up to fight the growing challenge faced by the industry of unsafe and dangerous imported counterfeit products that are sold outside the normal retail channels putting consumers at risk.

Makita supplies, as well as the construction industry, many of Britain's largest businesses and organisations from the Armed Forces to rescue services, major utilities, manufacturing and service companies.

Makita has also established themselves as a market leader in the innovation of Anti Vibration Technology (AVT), with the launch of a range of heavy-duty products designed to reduce the vibrations often associated with heavy machinery. They are committed to producing the safest power tools, which results in longer and more efficient products, as well as protecting the user from possible long-term effects.

The HQ of the global Makita Corporation is in Aichi, Japan. Manufacturing and distribution is carried out throughout Asia, the Americas, Europe and the Middle East, Australia and New Zealand.
