

STERLING Separation Ltd reports exceptional market responses to its new range of oil/water separators for compressed air condensate. Investment in the all-new CS75 separator for 11kW compressors has proved particularly well placed, with sales well above expectations. A low cost and serviceable device, CS75 offers an affordable solution for users of smaller compressed air systems. Also available are all-new separators with capacities of 150, 450 and 1000 scfm offering quality construction with consistent performance at modest cost for the widest possible range of applications. With over 40 years in the business, every STERLING separator is 'THE PRODUCT OF EXPERIENCE'
