Immediate Release

Action Sealtite & Alco Valves Launch High Pressure Valves to the UK Market

Alco Valves and Action Sealtite release high-pressure valves to the UK market, suitable for any application with a gauge or transmitter, for measurement or isolation.

Alco manufactures an extensive range of technically advanced, high integrity valve products, with pressure ratings of up to 10,000 PSI. It manufactures its products in the UK under ISO 9001. This way, it is able to retain stringent quality control checks, provide accountability and absolute material traceability.

With agreements in place with many oil and gas majors, and significant investment in on-going Research and Development, Alco Valves has proven its place as a market leader and is set to stay ahead of the curve. Action Sealtite are now working in partnership with Alco to supply these products, from April 2017. Contact Action Sealtite for more information on 01235 512500
