Date of issue: June 13, 2017

Rittal Publishes New IT and Manufacturing Product Catalogue

Rittal's new System Catalogue 35 showcases the company's portfolio of products for the IT and manufacturing industries, which are designed to address the needs of design engineers, switchgear manufacturers and data centre operators.

With more than 900 pages, the latest catalogue is full of facts and figures on the broadest range of industrial enclosures, power distribution, climate control and IT infrastructure products, anywhere in the world.

For the first time, the catalogue will also feature solutions from Rittal Automation Systems and from Eplan.

It is available both in hardback and online, in German and English, with 13 further languages to follow shortly.

Rittal's new System Catalogue – edition 35 – provides IT professionals, and control and switchgear manufacturers with a comprehensive overview of Rittal's entire product portfolio.

This includes solutions for industrial housings and enclosures, power distribution, climate control and IT infrastructure, as well as software and services.

The publication also now features automation technology and handling tools for workshops. Users will find practical guidance on a broad range of software for the efficient design and configuration of control units and switchgear available from sister company Eplan.

The PDF version of the catalogue links the order number to the corresponding product landing page on the Internet. Users can pull up datasheets, configuration tools, CAD data, videos, certificates of conformity, performance diagrams, approvals, assembly and operating instructions, plus much more. There is also a direct connection to the Rittal online shop, with user-friendly functions for selection and purchase of the products described.

To receive a free copy of the catalogue, simply send an e-mail to Rittal at marketing@rittal.co.uk.

Notes

Rittal, headquartered in Herborn, Hessen, Germany, is a leading global provider of solutions for industrial enclosures, power distribution, climate control and IT infrastructure, as well as software and services. Systems made by Rittal are deployed across a variety of industrial and IT applications, including vertical sectors such as the transport industry, power generation, mechanical and plant engineering, IT and telecommunications. Rittal is active worldwide with 10,000 employees and 58 subsidiaries.

Its broad product range includes infrastructure solutions for modular and energy-efficient data centres with innovative concepts for the security of physical data and systems. Leading software providers Eplan and Cideon complement the value chain, providing interdisciplinary engineering solutions, while Rittal Automation Systems offers automation systems for switchgear construction.

Founded in Herborn in 1961 and still run by its owner, Rittal is the largest company in the Friedhelm Loh Group. The Friedhelm Loh Group operates worldwide with 18 production sites and 78 international subsidiaries. The entire group employs more than 11,500 people and generated revenues of around €2.2 billion in 2014. For the seventh time in succession, the family business has won the accolade "Top German Employer" in 2015.

Further information can be found at www.rittal.com and www.friedhelm-loh-group.com.
