## **Bunting Showcase Magnets and Magnetic Solutions at Southern Manufacturing & Electronics 2017**

[Bunting Magnetics](#) and [eMagnets UK](#) will be magnetically attracting visitors to stand U74 at the Southern Manufacturing & Electronics show held at FIVE in Farnborough, UK (21<sup>st</sup> to 23<sup>rd</sup> March 2017). On the stand will be a range of Magnets, Magnetic Assemblies, Magnetic Factory Solutions, and Magnetic Separators.

With their design and manufacturing European headquarters in Berkhamsted, UK, Bunting Magnetics specialises in providing customers with [magnet](#) and [magnetic assembly](#) solutions. The UK manufacture of Plastic Bonded Magnets, specialist and bespoke Magnetic Assemblies and Magnetising Equipment, accompanies the supply of Permanent Magnets, including Neodymium Iron Boron (such as discs, rings, rectangular blocks, and slugs), Samarium Cobalt, Alnico and Ferrite.

[Bunting's e-Magnets UK provides an on-line shop](#) for the purchase of a wide range of Magnets and Magnetic Products. The extensive range is shipped from Bunting's Berkhamsted facility, most within 24 hours.

In addition, the e-Magnets UK website has just been totally revamped, with the re-launch occurring on 17<sup>th</sup> January 2017.

The engineers at Bunting Magnetics work closely with customers to identify the best magnet solution. The experience and expertise of the team along with state-of-the-art technology, such as 3D Finite Element Analysis (FEA) analysis software, means that Bunting is able to provide customers with exceptional technical support.

With the range of Magnetic Factory Solutions, Bunting has applied magnetic principles to solve problems commonly found in the manufacturing workplace. The range includes [Magnetic Clamping Chucks](#), [Magnetic Lifters](#), the Magnetic Sheet Fanner and [Magnetic Sweeper](#). These provide simple magnetic solutions to prevent damage and injury, whilst also saving time and improving productivity.

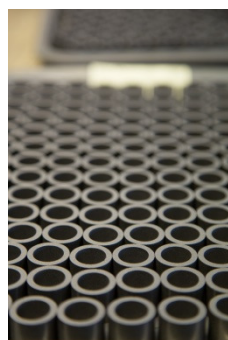

The Bunting range of Magnetic Separators is widely used throughout the process industry to separate and recover magnetically susceptible metal from processing materials. These include [Plate Magnets](#), [Tube Magnets](#) and the [FF Drawer Grate Magnet](#).

At Southern Manufacturing, the Bunting stand will be manned by experienced Sales Engineers with knowledge and understanding of how to magnetically solve problems in the workplace.

For further information on Magnets, Magnetic Assemblies, Magnetic Factory Solutions or Magnetic Separators, please visit the Bunting stand or contact our technical sales team on:
