Draft Trade Press Release

New Kasp Combination Locking Bolt – Convenient Keyless Security

Kasp, the leading brand in safety and security from Carl Kammerling International, is expanding its popular range of combination security products, which offer high quality, cost-effective security solutions for a multitude of domestic and industrial environments. The new **Kasp Combination Locking Bolt** is no exception, offering convenient, keyless security for a number of applications.

Great Features & Benefits

This premium, easy to use Combination Locking Bolt features a die cast matt black weatherproof body for durability and superior corrosion resistance. The bolt can also be fixed in a horizontal or vertical position and, with its 10mm hardened steel bolt and black tamper proof, stainless steel clutch head screws, offers the perfect high security solution for gates, sheds and lockers.

A 4-dial combination is resettable, and offers a choice of 10,000 settings, which can be set quickly and easily.

The Kasp Combination Locking Bolt measures 120mm x 48mm with 10mm bolt, with a large black slider button for ease of use in all locations. The bolt is lockable in both open and closed positions for added security and safety. A handy door frame fixing plate is also supplied with the combination locking bolt.

Helping Customers to Maximise Sales

Kasp provides the ideal one stop shop for customers looking to maximise sales, by offering a complete range of quality combination security products that are growing in demand. The Kasp Combination Locking Bolt also features, along with other Kasp products, in the exciting new CKI Magnetic Winter Sales promotion which runs from 1 September to 21 December 2021. Simply contact your local sales representative or telephone CKI customer services on 01758 704704 for details of the fantastic savings on offer.

Ends.
