## **Kasp Expands Its Quality Range of Security Chains & Cables**

Kasp, the leading brand in safety and security from Carl Kammerling International, has expanded its existing security chains range with three exciting new additions. This includes a unique **Kasp Combination Chain Lock**, a **Combination Cable Lock** and a **Double Loop Security Cable**, all offering high quality cost-effective security solutions for a multitude of domestic and industrial environments.

**Kasp Combination Chain Lock (K470810D)** This premium heavy duty 8mm hardened steel chain is twinned with a 5-dial combination lock to provide security and keyless convenience for items such as bikes, gates, garage items and site equipment such as tools and lighting.

Features and benefits include a woven fabric sleeve to protect paintwork and cutting attacks; hardened square steel links for extra protection from hacksaw and cropping attacks; a 5-dial combination lock with 100,000 combinations (resettable to your own combination); anti-pick resistance and a large easy to use dial.

**Kasp Combination Cable Lock (K4751215D)** This strong and flexible security cable includes a 4-dial combination lock, perfect for securing push bikes, gates, outdoor furniture, tools and equipment. This multi-strand flexible steel cable has a weather resistant protective vinyl coating; a 4-dial combination lock with 10,000 combinations (resettable to your own combination); and is also anti-pick resistant.

**Kasp Double Loop Security Cable (K4551018D/220D)** Available in two lengths, this robust and flexible security cable features a hardened braided steel cable with a weather and abrasions resistant vinyl coating. Ideal for securing push bikes, gates, garage items, outdoor furniture, tools and equipment, its double loop function allows the cable to have a longer reach by pushing one loop through the other to go around items. The other loop is then used to lock with a padlock.

Tina Skinner, Brand Manager at Kasp comments: "Following on from the successful introduction of Kasp security chains, we were keen to further develop the Kasp Security Cables and Chains range. We believe the new additions not only offer a great combination of products to suit all requirements, but also enable customers to maximise sales by offering exceptional price competitive options."
