CKI Announces Exciting Plans for its C.K PRO COBALT Hole Saws Range

Always looking to help its customers drive sales, Carl Kammerling International (CKI) is offering unbeatable discounts on its comprehensive range of high performance C.K PRO COBALT Hole Saws. Manufactured with premium grade alloy steel and 8% cobalt, PRO COBALT guarantees a superior cut, greater reliability and a more efficient output.

Customers will also be able to take advantage of new eye-catching range displays designed to allow consumers to make a quick and easy choice. A strong social media and consumer advertising campaign is also planned to communicate powerful key messages.

Providing everything trade professionals need to power through jobs quickly and efficiently, C.K PRO COBALT is faster than standard hole saws, and delivers a quick and effortless cut for a variety of materials including metal, wood, plastic and plasterboard. PRO COBALT uses M42 premium HSS (8% Cobalt High Speed Steel), which offers more heat resistance, durability, and impact strength for a higher penetration ability. A low profile design with optimised teeth configuration, gives the best cutting action to create smooth, precise holes. And the automatic slug ejection system quickly removes waste slugs from within the hole saw.

All C.K power tool accessories are designed to work seamlessly with power tools from all the major manufacturers. The C.K PRO COBALT range is no exception and offers the very best in *performance, reliability and output.*
