

# New Rubix Capabilities Brochure Highlights Extensive Product Range & Key Client Services

Rubix, the UK's leading supplier of industrial maintenance, repair and overhaul (MRO) products and services has released a new brochure which emphasises the breadth of products available from leading manufacturers, and its range of valuable services which help keep customer businesses running at their optimum.

Split into clear, concise and easy to read sections, the new 24-page brochure starts by providing customers with an insight into the extensive portfolio of products available through Rubix, from bearings, power transmission, and fluid power through to tools and health and safety products. The brochure then continues to highlight exclusive brands distributed by Rubix, plus the range of specialist technical and engineering services available, such as condition monitoring, maintenance and repair, customisation, assembly and installation, and engineering and automation solutions.

Some of the many logistics services Rubix has to offer are also highlighted, such as Vendor Managed Services, which include Invend™, Inscan™ and Insite™ which are designed to improve the process of buying, restocking, and managing fast-moving consumables.

Featuring a clear layout with full colour illustrations, the '*Rubix Capabilities*' brochure also includes a section on eProcurement services offered by the company, with charts to help customers identify the most appropriate solution for their needs.

Committed to providing customers with valuable cost savings, Rubix aims to increase production uptime, reduce total cost of ownership and streamline transactions, to help achieve significant cost efficiencies and work towards a more sustainable future. To demonstrate this, the new brochure also includes a selection of recent customer case studies, alongside a brief outline of the company's commitment to ethical and environmental practices.

The '*Rubix Capabilities*' brochure can be downloaded from the Rubix catalogue library on its website
