
The World's Most Advanced Portable Hand-Held Dew-point Hygrometer for the Measurement of Moisture in Gases

The **SADPmini2** range are the latest Portable Dew-point Meters to be added to Alpha Moisture Systems' trusted range of dewpoint hygrometers. The **SADPmini2-Ex** in this range is certified for use in Hazardous Areas to ATEX, IECEx & cULus.

For over 25 years, our ergonomically designed, rugged dewpoint hygrometers have been the first choice around the world for those expecting a high quality instrument offering long term reliability, accuracy, stability & repeatability.

Designed specifically to measure the moisture content of most gases and dry compressed air between -110°C to +20°C (-166°F to +68°F) dewpoint, the **SADPmini2** range incorporates the "Dry-Down Desiccant Chamber", allowing spot check results on sample gases literally within minutes.

Other notable features on both models are: AUTOCAL (Automatic Calibration), which ensures optimum accuracy between laboratory calibrations; rechargeable Li-ion batteries offering in excess of 150 hours continuous operation on a single charge; full onboard data logging capability; simple to use, easy navigation & intuitive control panel; user selectable option of all major European languages plus Russian, Chinese, Japanese and Korean; full colour graphical display capable of displaying results in two different units simultaneously; Bluetooth wireless connectivity; a "screenshot" feature for instantaneous capture of process results for subsequent downloading, or printing wirelessly.

Each instrument comes ready to use and with a certificate of calibration traceable to National Physical Laboratory, UK. **For more information contact Alpha Moisture Systems on +44 (0)1274 733 100. Email: info@amsystems.co.uk or visit <https://www.amsystems.co.uk>**
