

## **RENOVOTEC PRESS RELEASE**

### **RENOVOTEC INTRODUCES HIGH SPEED TEMPERATURE SCREENING SYSTEM FOR THE COVID-19 ENVIRONMENT**

- At-entrance, AI-driven thermal imaging system detects above-normal temperatures within two seconds**
- Provides a fast, early and accurate health alert for all temperature-related illnesses including COVID-19, colds and flu**
- Suitable for high-volume-personnel distribution centres, factories, stadia, airports and offices**
- Successfully piloted in two production facilities**
- “This system is a game changer. It will help to protect worker safety and has the potential to save time and money by optimising attendance levels”* says Renovotec managing director Richard Gilliard**

***For immediate release 4 November 2020***--Renovotec, the UK’s fastest growing rugged hardware, software and services provider for supply chain companies is introducing a new high speed, accurate, data-secure and non-contact temperature screening system for at-entrance use in distribution centres and factories, stadia, airports and larger offices. Honeywell’s ThermoRebellion™ system uses AI and thermal imaging technology to read skin temperature as individuals pass in front of its high resolution camera, generating an above-normal reading within two seconds that can indicate the presence of temperature-related illnesses including COVID-19, colds and flu.

The system uses a thermal image of the individual to determine skin temperature by focusing on facial features such as the inner canthi of the eye. It has already been successfully piloted in two of Honeywell’s US production facilities.

“This system is a game changer. It will help to protect worker safety and has the potential to save time and money by optimising attendance levels” says Renovotec managing director Richard Gilliard.

**Company background ([www.renovotec.com](http://www.renovotec.com))**

Renovotec is the UK’s fastest growing provider of rugged hardware software and services for supply chain users. The company’s approach to rugged hardware purchase and rental is customer-driven and manufacturer-independent.

Renovotec's rugged-hardware-as-a-service (r-HaaS) combines ongoing user support with zero capital outlay, allowing companies to scale their hardware flexibly, and with confidence.

Renovotec is an expert in field mobility service technology running on rugged mobile devices, and is the UK's leading exponent of automatic data capture (AIDC) on rugged and mobile hardware using voice, scanning and RFID technology.
