

BE SMART!

HBM EXPLAINS ALL IN LATEST WEBINAR ON MEASUREMENT TECHNOLOGY.

When it comes to optimising your production, HBM – a market leader in the field of test and measurement - has the answers in its latest free webinar, which takes place on 5th and 16th April 2019.

Hosted by Michael Guckes, Product Manager for Signal Conditioners at HBM, [“Three Ways to Optimise your Production with IOT”](#) will look at how smart measurement technology can make production facilities more cost effective by using innovative signal conditioners with IOT interfaces. A live demonstration of a measurement with ClipX, the revolutionary new signal conditioner from HBM, using IOT interfaces, such as OPC.UA will also be shown.

Designed to fit in with challenging work restraints, which can often make attending training courses difficult, [“Three Ways to Optimise Your Production”](#) will take place on both Friday 5th April and Tuesday 16th April. Each webinar, which will commence at 10am (GMT) and usually takes a maximum of 30 minutes, can be easily assessed at a later date or simply used as a refresher course. As an added benefit, all registered attendees will receive a link to the webinar, via email, after the presentation.

All webinars are free of charge and open to anyone. However, spaces are limited and are available on a first come, first served basis so reserve your space by visiting <https://bit.ly/2TQBGfy>

The manufacturing industry is currently the least digitised industrial sector but it is also the sector that can benefit the most from Industry 4.0 applications. As profit margins continue to shrink, with increasing pressure to produce better, faster and cheaper product, manufacturers are continually looking for ways to increase their efficiency whilst reducing costs.
