

PRESS RELEASE

8th February 2018

Pregis to launch innovative ‘green’ packaging solutions at NEC shows this spring

Pregis Limited will be showcasing their world class suite of Easypack environmentally friendly packaging solutions at this year’s Packaging Innovations and eDelivery Expo shows taking place at the NEC in February and March 2018.

The award-winning Easypack range of high quality, in-the-box packaging systems produce **100% recycled, 100% recyclable and 100% biodegradable paper** cushions, suitable for protecting and securing all kinds of goods-in-transit from breakables through to heavy engineered products.

During both of these two day events, the Pregis team of packaging experts will also be giving live demonstrations of a multitude of clever, packing techniques that can transform packing operations, cut costs and help to protect the environment. Visitors can also pick up information on a range of value-led services ranging from packing training through to their much-valued tree-saving initiative.

The new products on show this year include:

- **Packmaster™ pro** – the next generation of their best-selling **Packmaster™**, this state-of-the-art advanced void-fill solution is unmatched and converts 100% recycled single or twin-ply paper at high speeds, creating robust, paper cushions that are up to 80 times the original paper volume.
- **Packmate™pro** – their most advanced compact void-fill packaging system that produces 100% recycled paper cushions at high speeds, making it a valuable and versatile solution for fast-moving packing operations.
- **Quantum™XT** - ideal for every packing station, this totally compact, user-friendly void fill system is completely versatile and with output speeds of up to 1.8m per second, it allows users to easily pack goods quickly, efficiently and in any location.
