

NEW UNIGLOVES BROCHURE FEATURES INDUSTRIAL SINGLE USE GLOVE SOLUTIONS

Global single use glove specialist Unigloves, has launched a new brochure bringing together its latest high performance, ground breaking hand protection solutions in one easy to use place.

Able to be downloaded free at: <https://unigloves.co.uk/resources/literature/> the new 32-page brochure provides detailed information on the very latest glove solutions from Unigloves – including its industrial glove solutions.

The new brochure introduces the range of PRO.TECT industrial gloves – designed to be stronger than traditional gloves on the market. The more durable products - such as the new silicone free PRO.TECT Orange HD - are also chemical resistant to protect against, oils, grease and other industrial fluids.

Available in standard and extended cuff variations they are also offered with a raised grip pattern for enhanced grip in wet and oily environments.

Backing up the industrial glove range information the new brochure also features a range of technical information, glove selection guide, glove sizing guide and an overview of existing glove standards.

With a global customer base stretching over 50 countries, Unigloves manufactures billions of gloves every year and has built its reputation on excellent customer service and its focus on 'Safety through Quality'.

“The new brochure is a fantastic resource for anyone with the responsibility for identifying and selecting single use specialist gloves in industrial settings,” said Unigloves Marketing Director Donald Gillespie.

“The combination of detailed product information, features, benefits and wider resources and information guides helps the glove selection process become a much simpler process,” he added.

To download the brochure visit <https://unigloves.co.uk/resources/literature/>. To receive a physical copy call 0845 009 0083, or email enquiries@unigloves.co.uk.
