

RESS RELEASE

DATE: September 2018

## **Alcumus shortlisted for two awards with its Info Exchange Software Solution**

Alcumus, together with its client William Hill, is delighted to announce that it has been shortlisted for two coveted awards: 'The Fraud Awards 2018 for Most Innovative In-Store Solution' and 'Risk Management Awards 2018 for **Best Use of Technology in Risk Management – Partnership**'.

As a market-leading provider of technology-enabled compliance risk management, certification and accreditation services, Alcumus entered the awards to showcase its Info Exchange software and the benefits implementing the software has brought to its client William Hill.

Since implementing the software nearly three years ago, William Hill now utilise Alcumus' Info Exchange software for 12 applications including health and safety, security incidents, GDPR and Self Exclusion. With over 2,000 betting shops UK wide, investing in Info Exchange to assist with its crime prevention is where William Hill has seen the greatest benefit to date. Not only has utilising the software to record and manage all security incidents including fraud, theft and robberies saved them invaluable time and duplication effort from their old paper/excel based systems, it has enabled William Hill to collect a wealth of information for their intelligence team. Robbery and burglary figures are at an all-time low, with robberies down from 360 per annum in 2009 to less than 100 per annum today.

Gerard Davies, Head of Retail Security at William Hill, believes that their use of Info Exchange has been a contributing factor to this decline. Gerard explains: "The ability William Hill now has to analyse the data we collect, together with the risk assessment programme we run that also sits on Info Exchange, has helped us to facilitate a more proactive approach to crime mitigation. With the duplication of effort through manual recording now removed, our time is now focused on spotting trends, cross-correlating data, enabling us to build accurate risk profiles that facilitate a proactive approach to hazard control and risk mitigation".

Danny Reeves, Info Exchange MD, commented: "We are thrilled to hear we have been shortlisted for both the Fraud and Risk Management awards. We take pride in partnering with our clients to ensure their investment in our software brings them great results and we are very proud of the result utilising Info Exchange has brought and continue to bring to William Hill. We look forward to hearing the overall winner announcements later this year at both award ceremonies".

The award ceremony for the Fraud Awards will take place on the 4th of October 2018 at Leicester City Football Club followed by the Risk Management Awards on the 8th of November 2018, in London.
