

Press release
9th March 2017

Scott Safety takes half mask respiratory protection to the next level with its new AVIVA

The new AVIVA is the latest innovative half mask from Scott Safety, a world leader in the design and manufacture of respirators and personal protective equipment. Ensuring worker's wellbeing is priority; its low-profile head harness offers greater stability and compatibility with safety helmets and eye protection. Workers will relish the comfort that comes from the AVIVA half mask.

The cutting-edge half mask, which is silicone-free but designed with silicone-like comfort, features novel design elements. AVIVA offers a reflex seal which allows the wearer added movement and flexibility, a positive fit check button that is built into the device guaranteeing a secure fit of the half mask. Enhanced voice intelligibility enables the wearer to be clearly heard by those around ensuring clear lines of communication. The AVIVA half mask is available for use with a wide range of filters permitting use of the device in a variety of applications and industrial situations such as asbestos removal, manufacturing, welding and pharmaceuticals.

Last year, around 33,000 workers suffered breathing or lung problems thought to be caused or made worse by their working environments¹. One of the industry's biggest issues is badly fitted, uncomfortable equipment, discouraging workers to use their kit correctly. Scott Safety is helping to eradicate this problem with the introduction of this easy-to-use mask that provides complete respiratory protection, low breathing resistance and increased comfort and fit. The AVIVA half mask is available in small, medium and large sizes and a variety of packaging types including Readypak options for specific applications, some of which have the advantage of permitting the user to regularly store the half mask, keeping it clean and correctly formed for optimum fit.

AVIVA is now available from Scott Safety approved distributors. For more information please visit www.scottsafety.com/emea
