## **Rittal Air Circuit-Breaker Supporting System**

**Rittal, the leading global provider of industrial enclosures, power distribution, climate control and IT infrastructure, has developed a new busbar supporting system for air circuit-breakers. The system has been developed to enable 4 x 120 mm x 10 mm coppers to be secured safely to the top and bottom of the air circuit-breaker.**

It has been carefully designed to ensure ease of use, maximum convenience and faster fitting for system integrators.

The support, which is suitable for 600 and 800mm wide enclosures, is quick to install within Rittal's Ri4Power modular switchgear systems, speeding up the time needed for installing air circuit-breakers in Ri4Power. With only part number to order it simplifies the ordering process and reduces stocking levels for the panel builder.

Installation instructions are straightforward and there is clear guidance on the spacing of the support enabling verification up to 100 kA Icw for one second.

The new system has been tested in line with IEC 61439 and can be used with all leading circuit-breaker manufacturers' products up to 4000 amps.

### **Notes**

Rittal, headquartered in Herborn, Hessen, Germany, is a leading global provider of solutions for industrial enclosures, power distribution, climate control and IT infrastructure, as well as software and services. Systems made by Rittal are deployed across a variety of industrial and IT applications, including vertical sectors such as the transport industry, power generation, mechanical and plant engineering, IT and telecommunications. Rittal is active worldwide with 10,000 employees and 58 subsidiaries.

Its broad product range includes infrastructure solutions for modular and energy-efficient data centres with innovative concepts for the security of physical data and systems. Leading software providers Eplan and Cideon complement the value chain, providing interdisciplinary engineering solutions, while Rittal Automation Systems offers automation systems for switchgear construction.

Founded in Herborn in 1961 and still run by its owner, Rittal is the largest company in the Friedhelm Loh Group. The Friedhelm Loh Group operates worldwide with 18 production sites and 78 international subsidiaries. The entire group employs more than 11,500 people and generated revenues of around €2.2 billion in 2014. For the seventh time in succession, the family business has won the accolade "Top German Employer" in 2015.
