

Unexpected price + performance

Fast, precise, compact and certified, Endress+Hauser's Easytemp TMR31 and TMR35 temperature transmitters are entry-level instruments with a difference: they exceed expectations in terms of price and performance.

Easytemp has been developed to deliver high performance and reliability at a cost-effective price, starting from just £66. With a quick-sensing measuring element the Easytemp transmitters deliver fast recognition of any process changes with a response time of under two seconds, one of the fastest on the market today, which offers huge improvements to the efficiency of any production or monitoring system.

They're also really accurate thanks to the four-wire class A RTD thin film sensor located in the tip of the instrument. Integration of the Easytemp into your process is simple: available as a programmable mA transmitter or as an RTD signal, the instrument's output can be tailored to suit any modern control system. The Easytemp's compact size, at only 61mm tall and 18mm wide, also helps easy installation into the smallest of spaces.

Easytemp has a range of accreditations and certificates, making it suitable for a wide variety of applications. Calibration certificates are available as standard along with 3.1 material certification and, for hygienic applications, the TMR35 has 3A and EHEDG approvals.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. The Group employs 13,000 personnel across the globe, generating net sales of more than 2.1 billion euros in 2016.

Structure

With dedicated sales centers and a strong network of partners, Endress+Hauser guarantees competent worldwide support. Our production centers in 11 countries meet customers' needs and requirements quickly and effectively. The Group is managed and coordinated by a holding company in Reinach, Switzerland. As a successful family-owned business, Endress+Hauser is set for continued independence and self-reliance.

Products

Endress+Hauser provides sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition. The company supports customers with automation engineering, logistics and IT services and solutions. Our products set standards in quality and technology.

Industries

We work closely with the chemical, petrochemical, food & beverage, oil & gas, water & wastewater, power & energy, life science, primaries & metal, renewable energies, pulp & paper and shipbuilding industries. Endress+Hauser supports its customers in optimizing their processes in terms of reliability, safety, economic efficiency and environmental impact.

History

Founded in 1953 by Georg H Endress and Ludwig Hauser, Endress+Hauser has been solely owned by the Endress family since 1975. The Group has developed from a specialist in level measurement to a provider of complete solutions for industrial measuring technology and automation, with constant expansion into new territories and markets.
