

Watkins Hire would like to introduce its Temperature Control Emergency Planning Service (TCEPS).

TCEPS has been introduced to assist all organisations that rely on steam, heating, hot water or cooling for uninterrupted business continuity.

Our three levels of plan can be tailored to your own individual requirements.

Our TCEPS service is designed to offer total peace of mind by providing you with a comprehensive and detailed emergency plan, a free phone number for emergency call offs, reserved equipment (dependent on plan level), full installation, commissioning and transport planning, fuel management for the duration of the requirement - using our unique GSM telemetry service and 24/7, 365 day cover.
