

# Boiler Tube Cleaning Made Easier with Putzmaus®

Putzmaus® is a precision-engineered tube-cleaning system that has been designed to increase boiler efficiency and reduce fuel-consumption, **saving money** on both energy and repair costs, whilst also **saving time** on routine-maintenance.

Ultra-light, flexible and energy-efficient, Putzmaus® is easy-to-use and can be operated by just one person. It can work on both horizontal and vertical pipes with minimum clearance space, and its compact design makes it easy to carry and store.

Putzmaus® brushes are made from soft stainless-steel, and pulse forward and backward in the tube with no spinning action, protecting metal tubes from unnecessary material damage and extending their life. With all residue and corrosion removed, tubes are restored to a high polish and maximum efficiency.
