

**Sandhurst Instruments partner with H&B Sensors -combining their incredible product range and industry knowledge. Now able to provide a fully integrated service for all sensor solution requirements, to ever expanding market sectors.**

Sandhurst Instruments Ltd have been supplying the water utility industry for over 50 years, offering affordable WRAS approved water measuring instrumentation. They take pride in educating future generations of engineers, enabling them to manage this precious resource whilst protecting the environment.

H&B Sensors Ltd have been manufacturing an extensive range of industry-leading temperature measurement instrumentation including RTD's, Thermocouples and Thermowells since 1978. Specialising in industrial and hazardous area products they deliver bespoke and turnkey solutions for global industries from oil and gas to aerospace and pharmaceutical.

**West Sussex, 11.04.2022.**

Sandhurst Instruments Ltd and H&B Sensors announced today that they have entered a strategic partnership. This collaboration means an all-inclusive service for every measuring solution. From temperature, depth and pressure sensors to remote calibration equipment – We can help your company with its decision-making process, with our accurate, robust, reliable and proven measuring equipment. We offer bespoke instruments, tailored and made to your individual and specific requirements.

Phil Burns – MD of Sandhurst Instruments said *“We are delighted to enter into this collaboration. H&B sensors and Sandhurst Instruments are both market leaders in their own right, and this partnership will present a formidable force, as we continue our strategic growth together”*

Andrew Homer – MD of HB Sensors said, *“We are really excited to be working with Sandhurst Instruments, this new partnership will enable both companies to unlock opportunities that mutually benefit our respective customers and enable us to offer an enhanced offering.”*
