

BRADSHAW ANNOUNCES NEW GOUPIL G6 FOR THE UK

The Goupil G6, a 100% electrical utility vehicle is now available in the UK. The new addition expands the Goupil family, making the G6 a credible, environmental and economical solution for the sub 3,500kg market.

Generous payloads and volume

Designed for urban and suburban areas, the new Goupil G6 offers, depending on the configuration, a payload up to 1,200 kg and a loading capacity up to 9 m3.

Offering a smooth ride, the G6 can reach 50 mph with a range of up to 94 miles according to the WLTP cycle. Thanks to the 6.6 kW charger, the 30 kW battery can be fully charged in 5 hours using an electric charging station.

Ergonomics and comfort at the heart of the design of the G6

The cab and driving position have been designed to offer a high level of driver and passenger comfort. The new G6 comes with a comprehensive set of standard equipment: a 3-seater cab, electric windows, heated wing mirrors, regenerative braking, light and rain sensors. An LCD HD colour display allows real-time monitoring of electrical consumption and gives you access to the vehicle's key features.

A novel design with unprecedented body mounting options

The G6 is available with different body configurations: pick-up, cage tipper, 9 m3 box van, bulky waste collector and hydraulic hook lift, as well as a pressure washer and leaf collector options.

Keeping with the Goupil DNA for unparalleled flexibility, the chassis design enables bodybuilders to readily install customised bodies, like aerial work platforms, rear-load waste collection body, refrigerated bodies, and many more.
