

**Q8Oils to promote 'The Challenge' metal working fluid initiative and updated Q8 portfolio at Southern Manufacturing 2016**

**Farnborough. 9-11 February 2016. Stand T134.**

[Q8Oils](#) will be promoting its recently-launched products and service-led initiatives.

Q8Oils' revolutionary Q8 Brunel water-soluble machining and grinding fluid now offers ten grades developed to out-perform all other fluids. Suitable for use in hard or soft water, with ultra-low-foaming properties, they are ideal for high-speed machining applications and the demanding fluid delivery pressures found on modern machine tools. The range is also designed to be fully-compliant with the latest European legislation.

Also on show is Q8 Berlioz, a range of soluble cutting and grinding fluids developed to be tolerant to hard and soft water and free of formaldehyde, chlorine and secondary amines. All six grades have been formulated for the light- to heavy-duty machining of numerous ferrous and non-ferrous metals and alloys on CNC machines, machining centres, flexible manufacturing systems and all centralised systems.

With Q8Oils so confident in its new grades and existing portfolio, the company will continue to promote 'The Challenge', which offers machinists the opportunity to trial Q8 solutions on a payment-by-results basis.

Another service-led initiative being promoted is QCare, a network-enabled, tablet-based system with a bespoke 'app' that enables Q8Oils field service technicians to monitor fluids, complete audits and deliver results while still on site.

Q8 Oils offers a comprehensive lubrication solutions range in the following products:

- Passenger car engine oils
- Commercial vehicle engine oils
- Marine engine oils
- Outboard engine oils
- Motorcycle engine oils
- Automotive transmission and axle oils
- Universal transmission oils
- Gas engine oils
- Hydraulic fluids
- Plant maintenance oils
- Demoulding oils
- Quenching oils
- Process oils
- Neat cutting oils
- Neat forming fluids
- Soluble metal working fluids
- Heat transfer fluids
- Greases
- Extensive range of ancillary products
