

Press release: Sleeve caps

Close, cover, protect with Bülte sleeve caps

Do you need to close a tube, cover pieces or protect a thread? We have the solution.

New Bülte sleeve caps enables this and provides an aesthetical finishing.

The standard material is Polyethylene (PE), which is resistant to various chemical products. It also is flexible, non corrosive, non toxic as well as being very light.

Thanks to its special properties Polyethylene is also suitable for a wide variety of industries including: medical, aerospace, railway, toy, food, chemicals, electronics, electrical, building...

Protection caps are available from inside diameter from 5.0 to 20.0 mm and height from 22.0 to 36.0 mm.

Bülte offers a range of colours: white, red, yellow, blue... Minimum quantity 50 000 pieces by reference.

Samples and prices are available on request. For more information : www.bulte.com
