

## Endress+Hauser awarded MCERTS certificate

Endress+Hauser has achieved MCERTS certification for its CM44x analytical transmitter and associated CPS11D pH electrode. The award follows both laboratory testing and a field test on the effluent from a wastewater treatment works.

The transmitter and electrode utilise the unique Memosens data transmission technology seen across the majority of Endress+Hauser's analytical range. Now MCERTS installations can benefit from the technology that eliminates the problems of corrosion, leaks and measured value distortion from moisture. Memosens also makes maintenance far easier, reduces downtime and cuts the whole-life cost of the measurement.

The CM44x is a multi-parameter, multi-channel device that is also utilised in Endress+Hauser's MCERTS-certified range of automatic and portable samplers. This provides commonality and ease of use across many applications working to MCERTS standards. The CPS11D is a general pH electrode suitable for the majority of applications requiring a certified device, across all industries.

"We are delighted to have achieved MCERTS certification," said David Claridge, Business Development Manager for Water and Waste. "It's proof of Endress+Hauser's commitment to helping the process industries manage their impact on the environment."

## Notes

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. The Group employs approximately 12,000 personnel across the globe, generating net sales of 1.8 billion euros in 2013.

## Structure

With dedicated sales centers and a strong network of partners, Endress+Hauser guarantees competent worldwide support. Our production centers in 11 countries meet customers' needs and requirements quickly and effectively. The Group is managed and coordinated by a holding company in Reinach, Switzerland, with UK headquarters in Wythenshawe, Manchester. As a successful family-owned business, Endress+Hauser is set for continued independence and self-reliance.

## Products

Endress+Hauser provides sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition. The company supports customers with automation engineering, logistics and IT services and solutions. Our products set standards in quality and technology.

## Industries

We work closely with the chemical, petrochemical, food & beverage, oil & gas, water & wastewater, power & energy, life science, primaries & metal, renewable energies, pulp & paper and shipbuilding industries. Endress+Hauser supports its customers in optimizing their processes in terms of reliability, safety, economic efficiency and environmental impact.

## History

Founded in 1953 by Georg H Endress and Ludwig Hauser, Endress+Hauser has been solely owned by the Endress family since 1975. The Group has developed from a specialist in level measurement to a provider of complete solutions for industrial measuring technology and automation, with constant expansion into new territories and markets.
